  - Specializing in Web Applications incorporating heavy database usage and high availability infrastructure
- Database (Architecture, Development, DBA) with a history of managing hundreds of databases daily.
- ETL Services including
  - BI / Data Warehousing
  - Reporting Services
  - Extraction Services

## Differentiators

Coming off our recent success with developing software to integrate reporting services with the Internal Revenue Service's, ACA Information Return System (AIR), Cimplx has assembled a highly skilled, well rounded and experienced team of software developers with a complete 360 degree approach to web development to include bleeding edge infrastructure, software development and database administration services.

Located in the heart of the banking industry and supported by community initiatives in IT infrastructure and development, Cimplx IT is in an ideal location for rapid growth in the IT services industry. Rock Hill was the first community in the U.S. with gigabit internet services and has a heavy community mission to establish an environment to stimulate and grow Information Technology businesses. Coupled with strong recruiting firm partnerships and a history of success in scaling for projects, Cimplx IT will make an excellent partner to help in scaling IT resources as needed for sprint capacity and overall project outsourcing.

## Past Performance

- One of very few companies to successfully create software to directly integrate the A2A (Application to Application) platform to fully integrate with the IRS AIR (ACA Information Returns) Systems
- Completed and filed returns for 1000+ companies in 2016 and 2017 with companies ranging from large 10,000+ EE organizations to small 100 EE operations

## Company Data

With offices in Rock Hill, SC and Alexandria, VA, Cimplx IT is a Certified **HUB Zone** and **Veteran Owned Small Business** specializing in three core areas: Infrastructure, Application Development, and Database Administration. Started in 2009 as Autumnwood Services, Inc., a software development company servicing the manufacturing industry and providing solutions for ecommerce and business management including fulfillment, inventory control, warehouse management and business analysis. With the introduction of the Affordable Care Act as a factor for employers in 2014, the company was rebranded as Cimplx and software was created to address new demands on employers with a high risk of compliance with the new law. In two years, the company grew from a small local firm to a national brand with to over 45 employees providing services in all 50 states and represented by 17 of the top 25 insurance firms in the U.S.

Cimplx was one of only a few companies to become certified as an Application to Application (A2A) software by the Internal Revenue Service and in the first IRS filing of 1095 information returns in 2015 Cimplx completed 10% of all transmissions filed with the IRS AIR filing system in the U.S.

In 2017, Cimplx IT was incorporated to take advantage of the excellent IT team we have assembled and diversify the brand by offering IT services to private, public and governmental agencies.
